Data generated in Mitsubishi Chemical Agri Dream

To ensure peak performance for DIASTAR™ film;

- Please ensure the film is facing the correct directions. The printed characters on the film should be legible from outside
- Please do not rub, scratch, or damage the inner coated surface of the film.
- Please read the “best practice” manual enclosed with the product.

General precautions;

- To avoid film deterioration, do not use Sulphur sprays around/near the film.
- The film may expand or contract with changing temperatures. Please tighten the film if it expands or become loose in hot temperature.
- Avoid direct sunlight and store in a dry area until you are ready to install.
